

NDC Direct Modules shorten payment times

NDC Direct Modules allow you to send your claims electronically direct to the payer. These electronic claims are received and processed faster than paper claims – which means faster payments.

Easier than paper claims

NDC Direct Modules are very simple to use. In NDCMedisoft, instead of selecting the option to print your claims, select the option to transmit electronic claims. The entire process is automated.

- NDC Direct Modules save you time by eliminating the need to print, sort by payer, and mail your claims

- NDC Direct Modules save you money by eliminating the costs of forms, envelopes, and reducing the cost of labor associated with paper claims
- NDC Direct Modules direct dial to the payer – no Internet connection is needed

Modules are available across the country

NDC Direct Modules are available for select payers across the US. Contact your NDCHealth Value-Added Reseller or NDCHealth directly for information on the modules available in your area.

NDC Direct Remittance simplifies posting Medicare payments

Deciphering Medicare Explanation of Benefits (EOBs) can be time-consuming and difficult – so can posting the payments to the correct patient ledgers. NDC Direct Remittance works with NDC Direct Modules to automatically post payments and adjustments to patient ledgers.

- NDC Direct Remittance downloads the Electronic Remittance Advice (ERA) file from the payer to the practice management system
- With a few keystrokes, the payments and adjustments are posted – Not only does this

save you time, it eliminates the math and keying errors often associated with manual posting

- NDC Direct Remittance avoids double-posting and handles non-patient items of penalty and interest
- A report is generated, which you can print, that details the payments and adjustments posted

Together we're better.

NDCHealth helps physicians improve healthcare delivery and better manage their business.
